Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 9-11,13-17, and 21, drawn to a safety system, classified in class 182, subclass 187.
- II. Claim 18, drawn to a method of preventing injury, classified in class 182, subclass 5.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product ,as set forth in claim 9, can be used in a process not requiring a prusik hitch, and the process as claimed can be practice with a product not requiring a platform, as set forth in claim 21.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
